ACKNOWLEDGEMENTS

The Ministry of Primary and Secondary Education would like to acknowledge contributions made towards the development and production of this Teachers’ Guide by:

- The national combined science learning area panel
- United Nations Children’s Fund (UNICEF)

ORGANISATION OF THE TEACHER’S GUIDE

This is a document intended for you the teacher to realise the recommended expected conduct towards the fulfilment of the new curriculum demands in the combined science learning area. It guides you to understand and engage you in the participation to implement the new curriculum in combined science.

This teacher’s guide is divided into two parts, A and B. Part A focuses on the critical documents you must have as a teacher. Part B deals with curriculum delivery, the content, objectives, methodology, instructional materials, class management and assessment.

PART A

2.0 CRITICAL DOCUMENTS

INTRODUCTION

As a teacher it is important for you to have critical documents.

Rationale

This syllabus develops learners’ basic scientific skills in physics, chemistry and biology. The syllabus covers science concepts such as observing, recording, measuring, presentation interpretation of data and analysis. It also imparts practical skills such as handling of apparatus chemicals, plant and animal specimens safely and confidently.

Objectives

By the end of this part you should:
   a) Identify critical documents you should have
   b) Show understanding of each document

You should have the following critical documents:
   ● Curriculum Framework
   ● National Syllabus
   ● School syllabus
   ● Scheme cum plan or Schemes of Work and lesson plans
   ● Learner profiling guide
   ● Assessment framework
   ● Learner Profile
   ● Progress Records
   ● Register of Attendance
UNIT 1

Curriculum Framework for Zimbabwe Primary and Secondary Education 2015-2022

This is a document that outlines the underpinning national philosophy, principles, learning areas, the description and expectations of Ministry of Primary and Secondary education (MOPSE) at policy level, serving as a prescription of government expectations.

Objectives

By the end of unit 1 on critical documents the teacher should be able to:
- Identify key elements of the curriculum
- Demonstrate the understanding of values that defines the curriculum

Key elements

Below are the key elements that define the curriculum:
- Background
- Principles and values guiding the curriculum
- Goals of the curriculum
- Learning areas
- Teaching and learning methods
- Assessment and learning
- Strategies for effective curriculum implementation
- The future
UNIT 2

2.0 SYLLABUS INTERPRETATION

Introduction

The syllabi are key documents for you as a teacher which you should always refer to.

Objectives

By the end of this unit you should be able to interpret the national and school syllabi understanding the following components:
- Aims
- Content
- Assessment
- Objectives
- Methodology
- Assessment and format

Types of syllabi

- National syllabus
- School syllabus

2.1 National syllabus

- Definition

It is a policy document that outlines and specifies the learning area philosophy, aims and objectives, learning/teaching concepts and content, suggested methodology and assessment criteria at every level. As a teacher, you should always have it to guide you in your day to day teaching and learning activities.

Elements of the national syllabus

acknowledgements.
- Preamble
- Introduction
- Rationale
- Summary of content
- Methodology and time allocation.
- Assumptions
- Cross cutting themes
- Presentation of the syllabus.
- aims
- Syllabus
- objectives
- topics
- scope and sequence chart.
- Competency matrix
- Assessment
Content

Refer to the combined science form 1 to 4 national syllabus

2.2 School Syllabus

This should be drawn at school level from the National Syllabus by reorganising content taking into account local factors. (see section Syllabus Interpretation)

Factors influencing drafting

- Level of learner performance (knowledge they already have) this can be established from progress reports and evaluations.
- Relevant facilities and resources (efficient and effective allocation of relevant resources)
- Time allocation in the official syllabus
- Local conditions that affect the choice and sequencing of topics
- Education technology
- Community influences

Elements

- Topics/Content
- activities
- time allocation
- methodology (N.B. learner – centered)
- instructional or teaching materials
- assessment
UNIT 3: Schemes of work

It is usually an interpretation of a specification or syllabus and can be used as a guide throughout the course to monitor progress against the original plan.

Components

UNIT 4

LESSON PLAN

This is a detailed daily plan of what you intend to deliver during the lesson. This is to be used in the event of you having drawn a scheme of work rather than a scheme cum plan.

Components of a lesson plan

Date
Time
Learning area
Topic/content
Sub-topic
S.O.M
Equipment
Number of students
Assumed knowledge
Lesson objectives
Lesson development
Lesson evaluation

DETAILED LESSON PLAN

Date: 17 January 2017
FORM: 3
Time: 11.00 to 12:10
Learning Area: Biology
Topic/Content: Cells
Sub-Topic: Plant cells
S.O.M: Combined science Syllabus form 1 to 4 page 23
Approved textbooks

Media and Equipment: Onion, chart on plant cells, model on plant cells, iodine solution, prepared plant cell slides for bio-viewers, bio-viewers, hand lenses, scalp, glass slides, microscope
Number of students: 45
Assumed Knowledge: Learners know that plants are living organisms

Lesson Objectives

By the end of the lesson, learners should be able to:
  * Identify the structure of plant cells
  * Draw and label a plant cell
<table>

UNIT 5

RECORD KEEPING

Definition

Records are critical documents on the teaching/learning process which you should keep as a teacher.

Records to be kept

- Curriculum framework for primary and secondary education 2015-2016
- Syllabi (National and school)
- Schemes of work, lesson plan / scheme cum plan
- Class attendance register
- Teacher’s guide
- Progress records
- Asset and control register
- Inventory
- Learner profile
UNIT 6

3.0 PART B : CURRICULUM DELIVERY

Introduction

Unit 6 deals with curriculum delivery which involves content, objectives, methodology, learning / teaching materials, evaluation/assessment and class management.

3.1 Objectives

An objective should be Specific, Measurable, Attainable, Relevant and Time framed (SMART).

For example: By the end of the lesson learners should be able to identify and label 5 parts of a plant cell.

3.2 CONTENT

This refers to the amount of work to be covered in a particular lesson. For example:

**Topic Content**

Cells, Plant cells: cell membrane, cell wall, cytoplasm, nucleus

3.3 METHODOLOGY

It refers to strategies or approaches used to achieve set objectives. These should be learner centered and problem solving approaches.

**Example**

Group discussions

Experiments

3.4 TEACHING AND LEARNING MATERIALS

These are tools used by learners and their facilitators during lessons.

**Examples**

Bio-viewer

Microscopes

Plants specimens

3.5 ASSESSMENT AND EVALUATION

**Definition**

Assessment is the systematic collection of data to monitor the success of a course in achieving intended learning outcomes for students.

Evaluation is judgment by the teacher about whether the learning has met its intended goals or not.
Examples
There are two types of assessment and evaluation:
- Formative evaluation (on going / continuous). Continuous assessment is a major innovation in the new curriculum through learner profiling. Examples are:
  - Inclass tests
  - Quiz
  - Projects
  - Research and assignments

- Summative evaluation; coming at the end of the course i.e Final examinations

3.6 CLASS MANAGEMENT

This is the process of planning, organizing leading and controlling class activities to facilitate effective and efficient learning. It helps to create an effective learning environment, motivate the learners, maintain class discipline and supervise class activities.
UNIT 7

SCOPE OF THE GUIDE

Unit 7 shows the depth and breadth of the content

Below is the list of topics found in the Form 1-4 combined science Syllabus.

BIOLOGY:
- Laboratory rules and safety
- Cells and levels of organization
- Nutrition
- Respiratory system
- Transport systems
- Reproduction in plants and animals
- Health and diseases

6.2 CHEMISTRY:
- Matter
- Acids, Bases and Salts
- Oxidation and Reduction
- Industrial Processes
- Organic Chemistry

6.3 PHYSICS:
- Measurements
- Force
- Energy
- Magnetism
Electricity

BREAK A TOPIC INTO TEACHABLE UNITS

Example

TOPIC: Industrial processes
Teachable units for the topic are listed below
Contact process

Teachable Unit for the Contact process
List the raw material used in the manufacture of sulphuric acid
Describe the manufacture of sulphuric acid
State the conditions needed for the production of sulphuric acid
State uses of sulphuric acid
The topic has been broken down into teachable units:

Lesson 1
Definition of contact process
List the raw material needed in the manufacture of sulphuric acid

Describe the manufacture of sulphuric acid
Content

RAW MATERIALS
Sulphur dioxide from burning iron pyrites/ sulphur, oxygen from air

CONDITIONS
Pressure: 1atm
Catalyst: Vanadium (V) oxide
Temperature of 450 to 500 degrees celsius

USES
Battery acid
Plastics
Explosives
Fertilizers
Detergents

Activities
Watching video on contact process

Methodology
Live media

Materials
Computer and projector
Flow chart
Recommended textbook

Evaluation
This section gives you information on how the learning area will be assessed, the weighting and skills to be tested, types of question and duration of each paper. This section also has assessment objectives, scheme of assessment, specification grid and assessment model. The assessment in combined science will be based on 40% continuous assessment and 60% summative assessment for form 1-4.

Impromptu speech
Written exercises
Quiz

The example on the contact process is a way in which the teacher can use to break down a topic into teachable units. As the teacher you are expected to break down all the other topics in the syllabus as given in the example above.

Conclusion

A comprehensive understanding of the combined science syllabus is mandatory to you so that you facilitate learning and teaching for the achievement of syllabus objective as well as learner competencies. Theory must be related to real life situations like safety, risk disaster management gender and equity, HIV and AIDS, enterprise skills and other cross cutting issues.

**7.2 CHEMISTRY**

---

18
## TOPIC 7.2.3 ACIDS, BASES AND SALTS

- Identification of acids and bases: litmus paper test
- Acid-base reactions
- pH scale
- Preparation of salts
- Reactions of metal + acid, acid + base, acid + carbonate

## TOPIC 7.2.4 INDUSTRIAL PROCESSES

- Production of peanut butter
- Production of soap
- Fractional distillation of liquid
- Electrolysis
- Electroplating

## TOPIC 7.2.5 OXIDATION AND REDUCTION

- Rusting: factors
- Chemical reactions: combustion
- Extraction of iron

## TOPIC 7.2.6 ORGANIC CHEMISTRY

- Types of fuels
- Complete and incomplete combustion
- Alkanes
- Alkenes
- Biogas production
- Ethanol
- Maheu
- Global warming

## TOPIC 7.3 PHYSICS

## TOPIC 7.3.1 DATA PRESENTATION

- Tallies, tables, bar graphs
- Straight line graphs
- Pie charts, line graphs, interpretation
- Pie charts, line graphs, interpretation and analysis

## TOPIC 7.3.2 MEASUREMENT

- Physical quantities
- S.I units
- Prefixes
- Conversions
- Density
- Physical quantities, accuracy and precision
- Density of liquids
- Derived quantities

## TOPIC 7.3.3 FORCE

- Effects of force
- Types of force
- Measurement of force
- Moments of force
- Resultant force
- Levers
- Weight and mass machines: inclined plane, pulleys, levers and gears
- Principles of pressure
- Fluid systems
- Pumps

## TOPIC 7.3.4 ENERGY

- Types of energy
- Energy conversions
- Law of conversion of energy
- Calculations on work
- Properties of light
- Sound energy
- Petrol and diesel engine
- Heat transfer: convection, conduction and radiation
- Heat transfer applications: solar water heater and solar cooker
- Telecommunications
